

IRO Certificate #4599

NOTICE OF INDEPENDENT REVIEW DECISION

June 14, 2002

Re: IRO Case # M2-02-0682-01

Texas Workers' Compensation Commission:

___ has been certified as an independent review organization (IRO) and has been authorized to perform independent reviews of medical necessity for the Texas Worker's Compensation Commission (TWCC). Texas HB. 2600, Rule133.308 effective January 1, 2002, allows a claimant or provider who has received an adverse medical necessity determination from a carrier's internal process, to request an independent review by an IRO.

In accordance with the requirement that TWCC assign cases to certified IRO's, TWCC assigned this case to ___ for an independent review. ___ has performed an independent review of the proposed care to determine if the adverse determination was appropriate. For that purpose, ___ received relevant medical records, any documents obtained from parties in making the adverse determination, and any other documents and/or written information submitted in support of the appeal.

The case was reviewed by a Board Certified Doctor of Chiropractic who is also a Certified Strength and Conditioning Specialist. He or she has signed a certification statement attesting that no known conflicts of interest exist between him or her and any of the treating physicians or providers, or any of the physicians or providers who reviewed the case for a determination prior to referral to ___ for independent review. In addition, the certification statement further attests that the review was performed without bias for or against the carrier, medical provider, or any other party to this case.

The ___ reviewer who reviewed this case has determined that, based on the medical records provided, the requested care is not medically necessary. Therefore, ___ agrees with the adverse determination regarding this case. The reviewer's decision and the specific reasons for it, is as follows:

Brief History

This case involves a now 52-year-old male injured on _____. He has undergone extensive evaluation and treatment for his injured knee and ankle.

Requested Service

Work Hardening Program

Decision

I agree with the carrier's decision to deny the requested work hardening program.

Basis for Decision

It has been over one year since the patient was injured, and extensive conservative treatment has failed, and been proven ineffective in resolving the patient's symptoms. The medical documentation does not support the need for a work hardening program, and there is no indication that further conservative treatment would be beneficial. The need for a work hardening program over a compliant home-based exercise program has not been established by treatment or documentation.

This medical necessity decision by an Independent Review Organization is deemed to be a Commission decision and order.
